01

Understand how to plan for a Conversational Insights implementation.

02

Discover Insights key features and integration with Conversational Agents and Agent Assist.

03

Review target user personas.

Conversational Insights

What decisions need to be made?

- What problem does Insights solve for my organization?
- What features will be most valuable for my use cases?
- How does Insights integrate with other GCP components and other CES solutions?
- Which user personas does Conversational Insights solve for?

Personas

Personas

Customer Experience Leader

- Improve customer experience within the contact center.

Customer Experience Leader

- Improve customer experience within the contact center.

Customer Experience Leader

- Agent training
- Agent turnover
- Understanding customer history

Customer Experience Leader

Role

- Analyzing conversations
- Establishing informed best practices
- Discovering new uses for GenAI

Customer Experience Leader

Role

- Analyzing conversations
- Establishing informed best practices
- Discovering new uses for GenAI

Customer Experience Leader

Desires

- Visibility over metrics such as customer sentiment, satisfaction, and issue resolution.

Customer Experience Leader

Desires

- Visibility over metrics such as customer sentiment, satisfaction, and issue resolution.

Contact Center Operations Manager

Goal

- Ensure that staff and tools are in place to handle call center volumes and objectives.

Contact Center Operations Manager

Goal

- Ensure that staff and tools are in place to handle call center volumes and objectives.

Contact Center Operations Manager

- Forecasting
- Scheduling

Contact Center Operations Manager

Role

- Predict workforce needs

Contact Center Operations Manager

- Predict workforce needs

Contact Center Operations Manager

- Reduce burnout
- Assign correct training courses to staff members based on their needs

Contact Center Operations Manager

Desires

- Assign correct training courses to staff members based on their needs

Agent Supervisor

Goal

- Agents handle conversations effectively
- Ensure contact center goals are met

Agent Supervisor

Goal

- Agents handle conversations effectively
- Ensure contact center goals are met

Agent Supervisor

Pain points

- Real-time awareness of agent performance
- Personalized coaching
- Agent burnout

Agent Supervisor

Pain points

- Real-time awareness of agent performance
- Personalized coaching
- Agent burnout

Agent Supervisor

Role

- Use personalized data to help individual agents improve and boost overall job satisfaction.

Agent Supervisor

Role

- Use personalized data to help individual agents improve and boost overall job satisfaction.

Agent Supervisor

Desires

- Use Insights to generate a conversation summary
- Create a mapping of agents and topics successfully handled
- Highlight important parts of a conversation

01

Define developer operations for release management.

CES deployment and operations

What decisions need to be made?

- How will you manage development, testing, and release environments?
- What interface will you use to differentiate between normal and anomalous operations and to measure performance?

Development in non-production environments

Developers and release managers must oversee the relevant development phases

Development in non-production environments

Developers and release managers must oversee the relevant development phases
